FLORIDA

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PUBLICATION PROGRAM: 1963 CENSUS OF MANUFACTURES

Industry Series (80 reports, Series MC63(2)–19A to 39D). Each report provides information for a group of related industries (e.g., dairy products). Final figures are provided for each of the 430 manufacturing industries on quantity and value of products shipped and materials consumed, cost of fuels and electric energy, capital expenditures, inventories, employment, payrolls, man-hours, value added by manufacturing, horsepower of equipment, number of establishments and number of companies. Comparable statistics for earlier years are provided where available.

For each industry, data on value of shipments, value added by manufacturing, capital expenditures, employment, and payrolls are shown by (a) geographic area, (b) employment-size class of establishments, and (c) degree of primary product class specialization. These reports will subsequently be assembled into Volume II, Industry Statistics.

Area Series (51 reports, Series MC63(3)–1 to 51). A separate report for each State and the District of Columbia presents data, for industries and industry groups, on value of shipments, value added by manufacturing, employment, payrolls, man-hours, new capital expenditures, inventories, and number of manufacturing establishments. Comparable statistics for earlier years are also provided. Similar totals for all manufacturing industries are shown for counties, standard metropolitan statistical areas, and cities with 10,000 or more inhabitants. For the important standard metropolitan statistical areas and larger counties, these data are shown by industry groups. The number of establishments in each major industry group is presented by size of establishment within county. These reports will subsequently be assembled into Volume III, Area Statistics. This volume will also include chapters for geographic divisions.

Subject Series (about 12 reports, Series MC63(1)–1 to 12). Each report contains detailed final statistics for an individual subject such as size of establishments, inventories, capital expenditures, fuels, and electric energy. These reports will subsequently be assembled into Volume I, Summary Statistics.

After separate final reports have been issued, they will be assembled and bound as follows:

Volume I, Summary Statistics
Volume II, Industry Statistics
  Part 1, Major Groups 20–28
  Part 2, Major Groups 29–39
Volume III, Area Statistics

Special Reports, Series MC63(S). In addition to the reports described above, a series of special reports will be issued. Subjects will include the number of manufacturing plants in each county (by 4-digit industry and employment size) and for each 4-digit industry (by county and employment size); indexes of physical volume of production; and other subjects to be announced later.

INDUSTRY DIVISION

Maxwell R. Conklin, Chief

ACKNOWLEDGMENTS—This report was prepared in the Industry Division under the direction of **Elmer S. Biles** and **Edward A. Robinson.** In particular, they were responsible for planning the content of the tables and text and for developing the criteria for reviewing the data. Professional personnel of the commodity areas of the Division were responsible for final determination of completeness and accuracy of the data.

Owen C. Gretton, Assistant Division Chief, gave general guidance and coordination to all aspects of the Census of Manufactures. **William Cooper** exercised staff responsibility for industry classification and for the system of classifying products and materials. Staff assistance was also provided by **Jack L. Ogus,** Assistant Division Chief, Research and Methodology. **Donald F. Clark, William R. Gray, Robert Torene,** and **Angela R. Daly** also participated importantly in various phases of the project.

Systems and procedures were developed in the former Economic Operations Division, **M. D. Bingham,** Chief, and in the present Systems Division, **Sol Dolleck,** Chief. Staff assistants for systems and procedures were **Samuel Schweid, Nathan Lesowitz,** and **Jack Margolis. Mary H. Johnson** and **Roger O. Lepage,** assisted by **Paul E. Poissant,** developed and supervised the computer programming under the direction of **Eugene L. Wendt.** Clerical procedures were developed by **William W. Perry** under the supervision of **Carl Mueller.** Quality control plans and procedures were developed by **George Minton, Maxwell D. Jeane, James Spallone,** and **John F. Powell** under the direction of **Herman H. Fasteau.**

Data processing and related operations were performed in the former Data Processing Systems Division, **Robert F. Drury,** Chief, and in the present Processing Division, **M. D. Fahey,** Chief, and **R. M. Micoly,** Assistant Chief.

Arthur Horowitz, in his capacity as Census of Manufactures Coordinator, made important contributions to the planning and operational phases of the work.

Introduction

This publication is part of a series which provides, for each of the nine census geographic divisions, information on the number of manufacturing establishments in each of the approximately 430 manufacturing industries classified according to their employment size class and the State and county within which they are located.

The reports are issued in two separately numbered series:

Series MC63(S)–4.1 to 4.9: **Location of Manufacturing Plants, by County, Industry, and Employment Size,** presents the data with emphasis on the county location. For each county within a State, the number of manufacturing plants in each industry is shown by employment size. Reports in this series are issued for each of the nine geographic divisions.

Series MC63(S)–3.1 to 3.9: **Location of Manufacturing Plants, by Industry, County, and Employment Size,** presents the data with emphasis on the industry. For each 4-digit industry, the number of manufacturing plants in each county is shown by employment size. Counties are shown in the State of location; State order is by geographic division. Separate reports are issued for each of nine industry groupings.

Individual reports in each of the above series are listed on the inside back cover.

The appendix table lists the industries in Standard Industrial Classification[1] (SIC) order and provides, at the U.S. level, the number of establishments in each size class. A full description of each industry appears in the Industry Series MC63(2)–19A to 39D of the 1963 Census of Manufactures (80 reports). These reports will be bound into Volume II, Industry Statistics, at the completion of the census program. In addition, a convenient summary description will appear in Appendix A of Volume I, Summary Statistics, and Volume III, Area Statistics. A detailed explanation of the background procedures and concepts used in taking the census of manufactures will be found in the introduction to the 1963 census volumes.

The States are arranged by Census Bureau geographic division. The Census division-State sequence used in the report is as follows:

New England
- Maine
- New Hampshire
- Vermont
- Massachusetts
- Rhode Island
- Connecticut

Middle Atlantic
- New York
- New Jersey
- Pennsylvania

East North Central
- Ohio
- Indiana
- Illinois
- Michigan
- Wisconsin

West North Central
- Minnesota
- Iowa

- Texas

Mountain
- Montana
- Idaho
- Wyoming
- Colorado
- New Mexico
- Arizona
- Utah
- Nevada

Pacific
- Washington
- Oregon
- California
- Alaska
- Hawaii

[1] See **Standard Industrial Classification Manual,** 1957, **and Supplement to the 1957 Edition,** 1963, Executive Office of the President, Bureau of the Budget.

All counties having one or more plants in an industry appear in alphabetical sequence within each State.

The employment size class assigned to each plant is based on the average 1963 employment total reported by the plant. Both production workers and "all other" employees at the manufacturing plant are included in this total figure. The plant employment figure represents the average employment of the four midmonth payroll periods in March, May, August, and November.

In census reports, actual figures on employment and other measures cannot be published in such area-industry-size precision without disclosing figures for individual companies. Accordingly, this publication which provides only establishment counts, fills in many of the data gaps necessarily arising in the regular 1963 Census of Manufactures published tables. For many analytical purposes, aggregates are not needed. Instead, the detailed count of manufacturing plants in this publication, cross-classified by industry, county, and size provides a revealing picture that will be useful to (a) those involved in economic development programs at the regional, State, and local area levels; (b) those engaged in industrial market analysis or allocation of sales territories; and (c) those concerned with industrial dispersion, geographical shifts of industry, and similar problems.

The use of these tables in conjunction with the census of manufactures State and industry reports (especially table 4 in the industry reports which provides figures on employment, payroll, value added, value of shipments, and capital expenditures by size of establishment) may permit closer approximations of the level of economic activity than these simple establishment counts. However, caution must be observed in making such approximations because there are very significant differences in the relationships among employment, payroll, cost of materials, value of shipments, value added, etc., for individual plants within each 4-digit industry and particularly by geographic area within industry. Judgments based on broad industry averages may be subject to serious error if these averages are applied to groups of plants within counties and industries. On an all-manufacturing basis, the average employment per establishment for 1963 for each of the standard employment size classes is as follows:

1 to 19 employee class, 6 employees;
20 to 49 employee class, 31 employees;
50 to 99 employee class, 69 employees;
100 to 249 employee class, 155 employees;
250 to 499 employee class, 346 employees;
500 to 999 employee class, 684 employees;
1,000 or more employee class, 2,545 employees.

Location of Manufacturing Plants: 1963

1963 CENSUS OF MANUFACTURES

MC63(S)-4.6

Location of Manufacturing Plants By County, Industry, and Employment Size

KENTUCKY
TENNESSEE
ALABAMA
MISSISSIPPI

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PUBLICATION PROGRAM: 1963 CENSUS OF MANUFACTURES

Industry Series (80 reports, Series MC63(2)–19A to 39D). Each report provides information for a group of related industries (e.g., dairy products). Final figures are provided for each of the 430 manufacturing industries on quantity and value of products shipped and materials consumed, cost of fuels and electric energy, capital expenditures, inventories, employment, payrolls, man-hours, value added by manufacturing, horsepower of equipment, number of establishments and number of companies. Comparable statistics for earlier years are provided where available.

For each industry, data on value of shipments, value added by manufacturing, capital expenditures, employment, and payrolls are shown by (a) geographic area, (b) employment-size class of establishments, and (c) degree of primary product class specialization. These reports will subsequently be assembled into Volume II, Industry Statistics.

Area Series (51 reports, Series MC63(3)–1 to 51). A separate report for each State and the District of Columbia presents data, for industries and industry groups, on value of shipments, value added by manufacturing, employment, payrolls, man-hours, new capital expenditures, inventories, and number of manufacturing establishments. Comparable statistics for earlier years are also provided. Similar totals for all manufacturing industries are shown for counties, standard metropolitan statistical areas, and cities with 10,000 or more inhabitants. For the important standard metropolitan statistical areas and larger counties, these data are shown by industry groups. The number of establishments in each major industry group is presented by size of establishment within county. These reports will subsequently be assembled into Volume III, Area Statistics. This volume will also include chapters for geographic divisions.

Subject Series (about 12 reports, Series MC63(1)–1 to 12). Each report contains detailed final statistics for an individual subject such as size of establishments, inventories, capital expenditures, fuels, and electric energy. These reports will subsequently be assembled into Volume I, Summary Statistics.

After separate final reports have been issued, they will be assembled and bound as follows:

Volume I, Summary Statistics
Volume II, Industry Statistics
  Part 1, Major Groups 20–28
  Part 2, Major Groups 29–39
Volume III, Area Statistics

Special Reports, Series MC63(S). In addition to the reports described above, a series of special reports will be issued. Subjects will include the number of manufacturing plants in each county (by 4-digit industry and employment size) and for each 4-digit industry (by county and employment size); indexes of physical volume of production; and other subjects to be announced later.

INDUSTRY DIVISION

Maxwell R. Conklin, Chief

ACKNOWLEDGMENTS—This report was prepared in the Industry Division under the direction of **Elmer S. Biles** and **Edward A. Robinson.** In particular, they were responsible for planning the content of the tables and text and for developing the criteria for reviewing the data. Professional personnel of the commodity areas of the Division were responsible for final determination of completeness and accuracy of the data.

Owen C. Gretton, Assistant Division Chief, gave general guidance and coordination to all aspects of the Census of Manufactures. **William Cooper** exercised staff responsibility for industry classification and for the system of classifying products and materials. Staff assistance was also provided by **Jack L. Ogus,** Assistant Division Chief, Research and Methodology. **Donald F. Clark, William R. Gray, Robert Torene,** and **Angela R. Daly** also participated importantly in various phases of the project.

Systems and procedures were developed in the former Economic Operations Division, **M. D. Bingham,** Chief, and in the present Systems Division, **Sol Dolleck,** Chief. Staff assistants for systems and procedures were **Samuel Schweid, Nathan Lesowitz,** and **Jack Margolis. Mary H. Johnson** and **Roger O. Lepage,** assisted by **Paul E. Poissant,** developed and supervised the computer programming under the direction of **Eugene L. Wendt.** Clerical procedures were developed by **William W. Perry** under the supervision of **Carl Mueller.** Quality control plans and procedures were developed by **George Minton, Maxwell D. Jeane, James Spallone,** and **John F. Powell** under the direction of **Herman H. Fasteau.**

Data processing and related operations were performed in the former Data Processing Systems Division, **Robert F. Drury,** Chief, and in the present Processing Division, **M. D. Fahey,** Chief, and **R. M. Micoly,** Assistant Chief.

Arthur Horowitz, in his capacity as Census of Manufactures Coordinator, made important contributions to the planning and operational phases of the work.

1963 CENSUS OF MANUFACTURES

LOCATION OF MANUFACTURING PLANTS BY COUNTY, INDUSTRY, AND EMPLOYMENT SIZE

Special Report MC63(S)–4.6

PART 6 East South Central Division

	Page
Kentucky	1
Tennessee	14

Mississippi	42
Appendix	53

Introduction

This publication is part of a series which provides, for each of the nine census geographic divisions, information on the number of manufacturing establishments in each of the approximately 430 manufacturing industries classified according to their employment size class and the State and county within which they are located.

The reports are issued in two separately numbered series:

Series MC63(S)–4.1 to 4.9: **Location of Manufacturing Plants, by County, Industry, and Employment Size,** presents the data with emphasis on the county location. For each county within a State, the number of manufacturing plants in each industry is shown by employment size. Reports in this series are issued for each of the nine geographic divisions.

Series MC63(S)–3.1 to 3.9: **Location of Manufacturing Plants, by Industry, County, and Employment Size,** presents the data with emphasis on the industry. For each 4-digit industry, the number of manufacturing plants in each county is shown by employment size. Counties are shown in the State of location; State order is by geographic division. Separate reports are issued for each of nine industry groupings.

Individual reports in each of the above series are listed on the inside back cover.

The appendix table lists the industries in Standard Industrial Classification[1] (SIC) order and provides, at the U.S. level, the number of establishments in each size class. A full description of each industry appears in the Industry Series MC63(2)–19A to 39D of the 1963 Census of Manufactures (80 reports). These reports will be bound into Volume II, Industry Statistics, at the completion of the census program. In addition, a convenient summary description will appear in Appendix A of Volume I, Summary Statistics, and Volume III, Area Statistics. A detailed explanation of the background procedures and concepts used in taking the census of manufactures will be found in the introduction to the 1963 census volumes.

The States are arranged by Census Bureau geographic division. The Census division-State sequence used in the report is as follows:

[1] See **Standard Industrial Classification Manual, 1957, and Supplement to the 1957 Edition, 1963,** Executive Office of the President, Bureau of the Budget.

New England
- Maine
- New Hampshire
- Vermont
- Massachusetts
- Rhode Island
- Connecticut

Middle Atlantic
- New York
- New Jersey
- Pennsylvania

East North Central
- Ohio
- Indiana
- Illinois
- Michigan
- Wisconsin

West North Central
- Minnesota
- Iowa
- Missouri
- North Dakota
- South Dakota
- Nebraska
- Kansas

South Atlantic
- Delaware
- Maryland
- District of Columbia
- Virginia
- West Virginia
- North Carolina
- South Carolina
- Georgia
- Florida

East South Central
- Kentucky
- Tennessee
- Alabama
- Mississippi

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

Mountain
- Montana
- Idaho
- Wyoming
- Colorado
- New Mexico
- Arizona
- Utah
- Nevada

Pacific
- Washington
- Oregon
- California
- Alaska
- Hawaii

All counties having one or more plants in an industry appear in alphabetical sequence within each State.

The employment size class assigned to each plant is based on the average 1963 employment total reported by the plant. Both production workers and "all other" employees at the manufacturing plant are included in this total figure. The plant employment figure represents the average employment of the four midmonth payroll periods in March, May, August, and November.

In census reports, actual figures on employment and other measures cannot be published in such area-industry-size precision without disclosing figures for individual companies. Accordingly, this publication which provides only establishment counts, fills in many of the data gaps necessarily arising in the regular 1963 Census of Manufactures published tables. For many analytical purposes, aggregates are not needed. Instead, the detailed count of manufacturing plants in this publication, cross-classified by industry, county, and size provides a revealing picture that will be useful to (a) those involved in economic development programs at the regional, State, and local area levels; (b) those engaged in industrial market analysis or allocation of sales territories; and (c) those concerned with industrial dispersion, geographical shifts of industry, and similar problems.

The use of these tables in conjunction with the census of manufactures State and industry reports (especially table 4 in the industry reports which provides figures on employment, payroll, value added, value of shipments, and capital expenditures by size of establishment) may permit closer approximations of the level of economic activity than these simple establishment counts. However, caution must be observed in making such approximations because there are very significant differences in the relationships among employment, payroll, cost of materials, value of shipments, value added, etc., for individual plants within each 4-digit industry and particularly by geographic area within industry. Judgments based on broad industry averages may be subject to serious error if these averages are applied to groups of plants within counties and industries. On an all-manufacturing basis, the average employment per establishment for 1963 for each of the standard employment size classes is as follows:

1 to 19 employee class, 6 employees;
20 to 49 employee class, 31 employees;
50 to 99 employee class, 69 employees;
100 to 249 employee class, 155 employees;
250 to 499 employee class, 346 employees;
500 to 999 employee class, 684 employees;
1,000 or more employee class, 2,545 employees.

Location of Manufacturing Plants: 1963

1963 CENSUS OF MANUFACTURES

MC63(S)-4.7

Location of Manufacturing Plants By County, Industry, and Employment Size

ARKANSAS
LOUISIANA
OKLAHOMA
TEXAS

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PUBLICATION PROGRAM: 1963 CENSUS OF MANUFACTURES

Industry Series (80 reports, Series MC63(2)–19A to 39D). Each report provides information for a group of related industries (e.g., dairy products). Final figures are provided for each of the 430 manufacturing industries on quantity and value of products shipped and materials consumed, cost of fuels and electric energy, capital expenditures, inventories, employment, payrolls, man-hours, value added by manufacturing, horsepower of equipment, number of establishments and number of companies. Comparable statistics for earlier years are provided where available.

For each industry, data on value of shipments, value added by manufacturing, capital expenditures, employment, and payrolls are shown by (a) geographic area, (b) employment-size class of establishments, and (c) degree of primary product class specialization. These reports will subsequently be assembled into Volume II, Industry Statistics.

Area Series (51 reports, Series MC63(3)–1 to 51). A separate report for each State and the District of Columbia presents data, for industries and industry groups, on value of shipments, value added by manufacturing, employment, payrolls, man-hours, new capital expenditures, inventories, and number of manufacturing establishments. Comparable statistics for earlier years are also provided. Similar totals for all manufacturing industries are shown for counties, standard metropolitan statistical areas, and cities with 10,000 or more inhabitants. For the important standard metropolitan statistical areas and larger counties, these data are shown by industry groups. The number of establishments in each major industry group is presented by size of establishment within county. These reports will subsequently be assembled into Volume III, Area Statistics. This volume will also include chapters for geographic divisions.

Subject Series (about 12 reports, Series MC63(1)–1 to 12). Each report contains detailed final statistics for an individual subject such as size of establishments, inventories, capital expenditures, fuels, and electric energy. These reports will subsequently be assembled into Volume I, Summary Statistics.

After separate final reports have been issued, they will be assembled and bound as follows:

Volume I, Summary Statistics
Volume II, Industry Statistics
  Part 1, Major Groups 20–28
  Part 2, Major Groups 29–39
Volume III, Area Statistics

Special Reports, Series MC63(S). In addition to the reports described above, a series of special reports will be issued. Subjects will include the number of manufacturing plants in each county (by 4-digit industry and employment size) and for each 4-digit industry (by county and employment size); indexes of physical volume of production; and other subjects to be announced later.

INDUSTRY DIVISION

Maxwell R. Conklin, Chief

ACKNOWLEDGMENTS—This report was prepared in the Industry Division under the direction of **Elmer S. Biles** and **Edward A. Robinson.** In particular, they were responsible for planning the content of the tables and text and for developing the criteria for reviewing the data. Professional personnel of the commodity areas of the Division were responsible for final determination of completeness and accuracy of the data.

Owen C. Gretton, Assistant Division Chief, gave general guidance and coordination to all aspects of the Census of Manufactures. **William Cooper** exercised staff responsibility for industry classification and for the system of classifying products and materials. Staff assistance was also provided by **Jack L. Ogus,** Assistant Division Chief, Research and Methodology. **Donald F. Clark, William R. Gray, Robert Torene,** and **Angela R. Daly** also participated importantly in various phases of the project.

Systems and procedures were developed in the former Economic Operations Division, **M. D. Bingnam,** Chief, and in the present Systems Division, **Sol Dolleck,** Chief. Staff assistants for systems and procedures were **Samuel Schweid, Nathan Lesowitz,** and **Jack Margolis. Mary H. Johnson** and **Roger O. Lepage,** assisted by **Paul E. Poissant,** developed and supervised the computer programming under the direction of **Eugene L. Wendt.** Clerical procedures were developed by **William W. Perry** under the supervision of **Carl Mueller.** Quality control plans and procedures were developed by **George Minton, Maxwell D. Jeane, James Spallone,** and **John F. Powell** under the direction of **Herman H. Fasteau.**

Data processing and related operations were performed in the former Data Processing Systems Division, **Robert F. Drury,** Chief, and in the present Processing Division, **M. D. Fahey,** Chief, and **R. M. Micoly,** Assistant Chief.

Arthur Horowitz, in his capacity as Census of Manufactures Coordinator, made important contributions to the planning and operational phases of the work.

1963 CENSUS OF MANUFACTURES

LOCATION OF MANUFACTURING PLANTS BY COUNTY, INDUSTRY, AND EMPLOYMENT SIZE

Special Report MC63(S)–4.7

PART 7 West South Central Division

	Page
Arkansas	1
Louisiana	11
Oklahoma	21
Texas	31
Appendix	65

Introduction

This publication is part of a series which provides, for each of the nine census geographic divisions, information on the number of manufacturing establishments in each of the approximately 430 manufacturing industries classified according to their employment size class and the State and county within which they are located.

The reports are issued in two separately numbered series:

Series MC63(S)–4.1 to 4.9: **Location of Manufacturing Plants, by County, Industry, and Employment Size,** presents the data with emphasis on the county location. For each county within a State, the number of manufacturing plants in each industry is shown by employment size. Reports in this series are issued for each of the nine geographic divisions.

Series MC63(S)–3.1 to 3.9: **Location of Manufacturing Plants, by Industry, County, and Employment Size,** presents the data with emphasis on the industry. For each 4-digit industry, the number of manufacturing plants in each county is shown by employment size. Counties are shown in the State of location; State order is by geographic division. Separate reports are issued for each of nine industry groupings.

Individual reports in each of the above series are listed on the inside back cover.

The appendix table lists the industries in Standard Industrial Classification[1] (SIC) order and provides, at the U.S. level, the number of establishments in each size class. A full description of each industry appears in the Industry Series MC63(2)–19A to 39D of the 1963 Census of Manufactures (80 reports). These reports will be bound into Volume II, Industry Statistics, at the completion of the census program. In addition, a convenient summary description will appear in Appendix A of Volume I, Summary Statistics, and Volume III, Area Statistics. A detailed explanation of the background procedures and concepts used in taking the census of manufactures will be found in the introduction to the 1963 census volumes.

The States are arranged by Census Bureau geographic division. The Census division-State sequence used in the report is as follows:

New England
- Maine
- New Hampshire
- Vermont
- Massachusetts
- Rhode Island
- Connecticut

Middle Atlantic
- New York
- New Jersey
- Pennsylvania

East North Central
- Ohio
- Indiana
- Illinois
- Michigan
- Wisconsin

West North Central
- Minnesota
- Iowa
- Missouri
- North Dakota
- South Dakota
- Nebraska
- Kansas

South Atlantic
- Delaware
- Maryland
- District of Columbia
- Virginia
- West Virginia
- North Carolina
- South Carolina
- Georgia
- Florida

East South Central
- Kentucky
- Tennessee
- Alabama
- Mississippi

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

Mountain
- Montana
- Idaho
- Wyoming
- Colorado
- New Mexico
- Arizona
- Utah
- Nevada

Pacific
- Washington
- Oregon
- California
- Alaska
- Hawaii

[1] See **Standard Industrial Classification Manual, 1957, and Supplement to the 1957 Edition, 1963,** Executive Office of the President, Bureau of the Budget.

All counties having one or more plants in an industry appear in alphabetical sequence within each State.

The employment size class assigned to each plant is based on the average 1963 employment total reported by the plant. Both production workers and "all other" employees at the manufacturing plant are included in this total figure. The plant employment figure represents the average employment of the four midmonth payroll periods in March, May, August, and November.

In census reports, actual figures on employment and other measures cannot be published in such area-industry-size precision without disclosing figures for individual companies. Accordingly, this publication which provides only establishment counts, fills in many of the data gaps necessarily arising in the regular 1963 Census of Manufactures published tables. For many analytical purposes, aggregates are not needed. Instead, the detailed count of manufacturing plants in this publication, cross-classified by industry, county, and size provides a revealing picture that will be useful to (a) those involved in economic development programs at the regional, State, and local area levels; (b) those engaged in industrial market analysis or allocation of sales territories; and (c) those concerned with industrial dispersion, geographical shifts of industry, and similar problems.

The use of these tables in conjunction with the census of manufactures State and industry reports (especially table 4 in the industry reports which provides figures on employment, payroll, value added, value of shipments, and capital expenditures by size of establishment) may permit closer approximations of the level of economic activity than these simple establishment counts. However, caution must be observed in making such approximations because there are very significant differences in the relationships among employment, payroll, cost of materials, value of shipments, value added, etc., for individual plants within each 4-digit industry and particularly by geographic area within industry. Judgments based on broad industry averages may be subject to serious error if these averages are applied to groups of plants within counties and industries. On an all-manufacturing basis, the average employment per establishment for 1963 for each of the standard employment size classes is as follows:

1 to 19 employee class, 6 employees;
20 to 49 employee class, 31 employees;
50 to 99 employee class, 69 employees;
100 to 249 employee class, 155 employees;
250 to 499 employee class, 346 employees;
500 to 999 employee class, 684 employees;
1,000 or more employee class, 2,545 employees.

1963 CENSUS OF MANUFACTURES

MC63(S)-4.8

Location of Manufacturing Plants By County, Industry, and Employment Size

MONTANA
IDAHO
WYOMING
COLORADO
NEW MEXICO
ARIZONA
UTAH
NEVADA

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PUBLICATION PROGRAM: 1963 CENSUS OF MANUFACTURES

Industry Series (80 reports, Series MC63(2)–19A to 39D). Each report provides information for a group of related industries (e.g., dairy products). Final figures are provided for each of the 430 manufacturing industries on quantity and value of products shipped and materials consumed, cost of fuels and electric energy, capital expenditures, inventories, employment, payrolls, man-hours, value added by manufacturing, horsepower of equipment, number of establishments and number of companies. Comparable statistics for earlier years are provided where available.

For each industry, data on value of shipments, value added by manufacturing, capital expenditures, employment, and payrolls are shown by (a) geographic area, (b) employment-size class of establishments, and (c) degree of primary product class specialization. These reports will subsequently be assembled into Volume II, Industry Statistics.

Area Series (51 reports, Series MC63(3)–1 to 51). A separate report for each State and the District of Columbia presents data, for industries and industry groups, on value of shipments, value added by manufacturing, employment, payrolls, man-hours, new capital expenditures, inventories, and number of manufacturing establishments. Comparable statistics for earlier years are also provided. Similar totals for all manufacturing industries are shown for counties, standard metropolitan statistical areas, and cities with 10,000 or more inhabitants. For the important standard metropolitan statistical areas and larger counties, these data are shown by industry groups. The number of establishments in each major industry group is presented by size of establishment within county. These reports will subsequently be assembled into Volume III, Area Statistics. This volume will also include chapters for geographic divisions.

Subject Series (about 12 reports, Series MC63(1)–1 to 12). Each report contains detailed final statistics for an individual subject such as size of establishments, inventories, capital expenditures, fuels, and electric energy. These reports will subsequently be assembled into Volume I, Summary Statistics.

After separate final reports have been issued, they will be assembled and bound as follows:

Volume I, Summary Statistics
Volume II, Industry Statistics
  Part 1, Major Groups 20–28
  Part 2, Major Groups 29–39
Volume III, Area Statistics

Special Reports, Series MC63(S). In addition to the reports described above, a series of special reports will be issued. Subjects will include the number of manufacturing plants in each county (by 4-digit industry and employment size) and for each 4-digit industry (by county and employment size); indexes of physical volume of production; and other subjects to be announced later.

INDUSTRY DIVISION

Maxwell R. Conklin, Chief

ACKNOWLEDGMENTS—This report was prepared in the Industry Division under the direction of **Elmer S. Biles** and **Edward A. Robinson.** In particular, they were responsible for planning the content of the tables and text and for developing the criteria for reviewing the data. Professional personnel of the commodity areas of the Division were responsible for final determination of completeness and accuracy of the data.

Owen C. Gretton, Assistant Division Chief, gave general guidance and coordination to all aspects of the Census of Manufactures. **William Cooper** exercised staff responsibility for industry classification and for the system of classifying products and materials. Staff assistance was also provided by **Jack L. Ogus,** Assistant Division Chief, Research and Methodology. **Donald F. Clark, William R. Gray, Robert Torene,** and **Angela R. Daly** also participated importantly in various phases of the project.

Systems and procedures were developed in the former Economic Operations Division, **M. D. Bingham,** Chief, and in the present Systems Division, **Sol Dolleck,** Chief. Staff assistants for systems and procedures were **Samuel Schweid, Nathan Lesowitz,** and **Jack Margolis. Mary H. Johnson** and **Roger O. Lepage,** assisted by **Paul E. Poissant,** developed and supervised the computer programming under the direction of **Eugene L. Wendt.** Clerical procedures were developed by **William W. Perry** under the supervision of **Carl Mueller.** Quality control plans and procedures were developed by **George Minton, Maxwell D. Jeane, James Spallone,** and **John F. Powell** under the direction of **Herman H. Fasteau.**

Data processing and related operations were performed in the former Data Processing Systems Division, **Robert F. Drury,** Chief, and in the present Processing Division, **M. D. Fahey,** Chief, and **R. M. Micoly,** Assistant Chief.

Arthur Horowitz, in his capacity as Census of Manufactures Coordinator, made important contributions to the planning and operational phases of the work.

1963 CENSUS OF MANUFACTURES

LOCATION OF MANUFACTURING PLANTS BY COUNTY, INDUSTRY, AND EMPLOYMENT SIZE

Special Report MC63(S)–**4.8**

PART 8 Mountain Division

	Page
Montana	1
Idaho	6
Wyoming	11
Colorado	13
New Mexico	21
Arizona	25
Utah	29
Nevada	33
Appendix	35

Introduction

This publication is part of a series which provides, for each of the nine census geographic divisions, information on the number of manufacturing establishments in each of the approximately 430 manufacturing industries classified according to their employment size class and the State and county within which they are located.

The reports are issued in two separately numbered series:

Series MC63(S)–4.1 to 4.9: **Location of Manufacturing Plants, by County, Industry, and Employment Size,** presents the data with emphasis on the county location. For each county within a State, the number of manufacturing plants in each industry is shown by employment size. Reports in this series are issued for each of the nine geographic divisions.

Series MC63(S)–3.1 to 3.9: **Location of Manufacturing Plants, by Industry, County, and Employment Size,** presents the data with emphasis on the industry. For each 4-digit industry, the number of manufacturing plants in each county is shown by employment size. Counties are shown in the State of location; State order is by geographic division. Separate reports are issued for each of nine industry groupings.

Individual reports in each of the above series are listed on the inside back cover.

The appendix table lists the industries in Standard Industrial Classification[1] (SIC) order and provides, at the U.S. level, the number of establishments in each size class. A full description of each industry appears in the Industry Series MC63(2)–19A to 39D of the 1963 Census of Manufactures (80 reports). These reports will be bound into Volume II, Industry Statistics, at the completion of the census program. In addition, a convenient summary description will appear in Appendix A of Volume I, Summary Statistics, and Volume III, Area Statistics. A detailed explanation of the background procedures and concepts used in taking the census of manufactures will be found in the introduction to the 1963 census volumes.

The States are arranged by Census Bureau geographic division. The Census division-State sequence used in the report is as follows:

New England
- Maine
- New Hampshire
- Vermont
- Massachusetts
- Rhode Island
- Connecticut

Middle Atlantic
- New York
- New Jersey
- Pennsylvania

East North Central
- Ohio
- Indiana
- Illinois
- Michigan
- Wisconsin

West North Central
- Minnesota
- Iowa
- Missouri
- North Dakota
- South Dakota
- Nebraska
- Kansas

South Atlantic
- Delaware
- Maryland
- District of Columbia
- Virginia
- West Virginia
- North Carolina
- South Carolina
- Georgia
- Florida

East South Central
- Kentucky
- Tennessee
- Alabama
- Mississippi

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

Mountain
- Montana
- Idaho
- Wyoming
- Colorado
- New Mexico
- Arizona
- Utah
- Nevada

Pacific
- Washington
- Oregon
- California
- Alaska
- Hawaii

[1] See **Standard Industrial Classification Manual, 1957, and Supplement to the 1957 Edition, 1963,** Executive Office of the President, Bureau of the Budget.

All counties having one or more plants in an industry appear in alphabetical sequence within each State.

The employment size class assigned to each plant is based on the average 1963 employment total reported by the plant. Both production workers and "all other" employees at the manufacturing plant are included in this total figure. The plant employment figure represents the average employment of the four midmonth payroll periods in March, May, August, and November.

In census reports, actual figures on employment and other measures cannot be published in such area-industry-size precision without disclosing figures for individual companies. Accordingly, this publication which provides only establishment counts, fills in many of the data gaps necessarily arising in the regular 1963 Census of Manufactures published tables. For many analytical purposes, aggregates are not needed. Instead, the detailed count of manufacturing plants in this publication, cross-classified by industry, county, and size provides a revealing picture that will be useful to (a) those involved in economic development programs at the regional, State, and local area levels; (b) those engaged in industrial market analysis or allocation of sales territories; and (c) those concerned with industrial dispersion, geographical shifts of industry, and similar problems.

The use of these tables in conjunction with the census of manufactures State and industry reports (especially table 4 in the industry reports which provides figures on employment, payroll, value added, value of shipments, and capital expenditures by size of establishment) may permit closer approximations of the level of economic activity than these simple establishment counts. However, caution must be observed in making such approximations because there are very significant differences in the relationships among employment, payroll, cost of materials, value of shipments, value added, etc., for individual plants within each 4-digit industry and particularly by geographic area within industry. Judgments based on broad industry averages may be subject to serious error if these averages are applied to groups of plants within counties and industries. On an all-manufacturing basis, the average employment per establishment for 1963 for each of the standard employment size classes is as follows:

1 to 19 employee class, 6 employees;
20 to 49 employee class, 31 employees;
50 to 99 employee class, 69 employees;
100 to 249 employee class, 155 employees;
250 to 499 employee class, 346 employees;
500 to 999 employee class, 684 employees;
1,000 or more employee class, 2,545 employees.

Location of Manufacturing Plants: 1963

ALASKA
HAWAII

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PUBLICATION PROGRAM: 1963 CENSUS OF MANUFACTURES

Industry Series (80 reports, Series MC63(2)–19A to 39D). Each report provides information for a group of related industries (e.g., dairy products). Final figures are provided for each of the 430 manufacturing industries on quantity and value of products shipped and materials consumed, cost of fuels and electric energy, capital expenditures, inventories, employment, payrolls, man-hours, value added by manufacturing, horsepower of equipment, number of establishments and number of companies. Comparable statistics for earlier years are provided where available.

For each industry, data on value of shipments, value added by manufacturing, capital expenditures, employment, and payrolls are shown by (a) geographic area, (b) employment-size class of establishments, and (c) degree of primary product class specialization. These reports will subsequently be assembled into Volume II, Industry Statistics.

Area Series (51 reports, Series MC63(3)–1 to 51). A separate report for each State and the District of Columbia presents data, for industries and industry groups, on value of shipments, value added by manufacturing, employment, payrolls, man-hours, new capital expenditures, inventories, and number of manufacturing establishments. Comparable statistics for earlier years are also provided. Similar totals for all manufacturing industries are shown for counties, standard metropolitan statistical areas, and cities with 10,000 or more inhabitants. For the important standard metropolitan statistical areas and larger counties, these data are shown by industry groups. The number of establishments in each major industry group is presented by size of establishment within county. These reports will subsequently be assembled into Volume III, Area Statistics. This volume will also include chapters for geographic divisions.

Subject Series (about 12 reports, Series MC63(1)–1 to 12). Each report contains detailed final statistics for an individual subject such as size of establishments, inventories, capital expenditures, fuels, and electric energy. These reports will subsequently be assembled into Volume I, Summary Statistics.

After separate final reports have been issued, they will be assembled and bound as follows:

Volume I, Summary Statistics
Volume II, Industry Statistics
  Part 1, Major Groups 20–28
  Part 2, Major Groups 29–39
Volume III, Area Statistics

Special Reports, Series MC63(S). In addition to the reports described above, a series of special reports will be issued. Subjects will include the number of manufacturing plants in each county (by 4-digit industry and employment size) and for each 4-digit industry (by county and employment size); indexes of physical volume of production; and other subjects to be announced later.

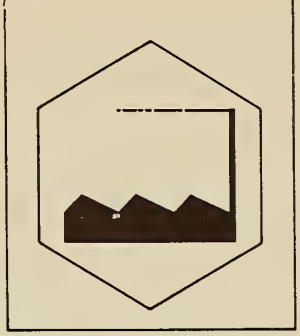
INDUSTRY DIVISION

Maxwell R. Conklin, Chief

ACKNOWLEDGMENTS—This report was prepared in the Industry Division under the direction of **Elmer S. Biles** and **Edward A. Robinson.** In particular, they were responsible for planning the content of the tables and text and for developing the criteria for reviewing the data. Professional personnel of the commodity areas of the Division were responsible for final determination of completeness and accuracy of the data.



Owen C. Gretton, Assistant Division Chief, gave general guidance and coordination to all aspects of the Census of Manufactures. **William Cooper** exercised staff responsibility for industry classification and for the system of classifying products and materials. Staff assistance was also provided by **Jack L. Ogus,** Assistant Division Chief, Research and Methodology. **Donald F. Clark, William R. Gray, Robert Torene,** and **Angela R. Daly** also participated importantly in various phases of the project.

Systems and procedures were developed in the former Economic Operations Division, **M. D. Bingham,** Chief, and in the present Systems Division, **Sol Dolleck,** Chief. Staff assistants for systems and procedures were **Samuel Schweid, Nathan Lesowitz,** and **Jack Margolis. Mary H. Johnson** and **Roger O. Lepage,** assisted by **Paul E. Poissant,** developed and supervised the computer programming under the direction of **Eugene L. Wendt.** Clerical procedures were developed by **William W. Perry** under the supervision of **Carl Mueller.** Quality control plans and procedures were developed by **George Minton, Maxwell D. Jeane, James Spallone,** and **John F. Powell** under the direction of **Herman H. Fasteau.**

Data processing and related operations were performed in the former Data Processing Systems Division, **Robert F. Drury,** Chief, and in the present Processing Division, **M. D. Fahey,** Chief, and **R. M. Micoly,** Assistant Chief.

Arthur Horowitz, in his capacity as Census of Manufactures Coordinator, made important contributions to the planning and operational phases of the work.

1963 CENSUS OF MANUFACTURES

LOCATION OF MANUFACTURING PLANTS BY COUNTY, INDUSTRY, AND EMPLOYMENT SIZE

Special Report MC63(S)–4.9

Appendix	49

Introduction

This publication is part of a series which provides, for each of the nine census geographic divisions, information on the number of manufacturing establishments in each of the approximately 430 manufacturing industries classified according to their employment size class and the State and county within which they are located.

The reports are issued in two separately numbered series:

Series MC63(S)–4.1 to 4.9: **Location of Manufacturing Plants, by County, Industry, and Employment Size,** presents the data with emphasis on the county location. For each county within a State, the number of manufacturing plants in each industry is shown by employment size. Reports in this series are issued for each of the nine geographic divisions.

Series MC63(S)–3.1 to 3.9: **Location of Manufacturing Plants, by Industry, County, and Employment Size,** presents the data with emphasis on the industry. For each 4-digit industry, the number of manufacturing plants in each county is shown by employment size. Counties are shown in the State of location; State order is by geographic division. Separate reports are issued for each of nine industry groupings.

Individual reports in each of the above series are listed on the inside back cover.

The appendix table lists the industries in Standard Industrial Classification[1] (SIC) order and provides, at the U.S. level, the number of establishments in each size class. A full description of each industry appears in the Industry Series MC63(2)–19A to 39D of the 1963 Census of Manufactures (80 reports). These reports will be bound into Volume II, Industry Statistics, at the completion of the census program. In addition, a convenient summary description will appear in Appendix A of Volume I, Summary Statistics, and Volume III, Area Statistics. A detailed explanation of the background procedures and concepts used in taking the census of manufactures will be found in the introduction to the 1963 census volumes.

The States are arranged by Census Bureau geographic division. The Census division-State sequence used in the report is as follows:

[1] See **Standard Industrial Classification Manual, 1957, and Supplement to the 1957 Edition, 1963,** Executive Office of the President, Bureau of the Budget.

New England
- Maine
- New Hampshire
- Vermont
- Massachusetts
- Rhode Island
- Connecticut

Middle Atlantic
- New York
- New Jersey
- Pennsylvania

East North Central
- Ohio

- District of Columbia
- Virginia
- West Virginia
- North Carolina
- South Carolina
- Georgia
- Florida

East South Central
- Kentucky
- Tennessee
- Alabama
- Mississippi

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

Mountain
- Montana
- Idaho
- Wyoming
- Colorado
- New Mexico
- Arizona
- Utah
- Nevada

Pacific
- Washington
- Oregon
- California
- Alaska
- Hawaii

All counties having one or more plants in an industry appear in alphabetical sequence within each State.

The employment size class assigned to each plant is based on the average 1963 employment total reported by the plant. Both production workers and "all other" employees at the manufacturing plant are included in this total figure. The plant employment figure represents the average employment of the four midmonth payroll periods in March, May, August, and November.

In census reports, actual figures on employment and other measures cannot be published in such area-industry-size precision without disclosing figures for individual companies. Accordingly, this publication which provides only establishment counts, fills in many of the data gaps necessarily arising in the regular 1963 Census of Manufactures published tables. For many analytical purposes, aggregates are not needed. Instead, the detailed count of manufacturing plants in this publication, cross-classified by industry, county, and size provides a revealing picture that will be useful to (a) those involved in economic development programs at the regional, State, and local area levels; (b) those engaged in industrial market analysis or allocation of sales territories; and (c) those concerned with industrial dispersion, geographical shifts of industry, and similar problems.

The use of these tables in conjunction with the census of manufactures State and industry reports (especially table 4 in the industry reports which provides figures on employment, payroll, value added, value of shipments, and capital expenditures by size of establishment) may permit closer approximations of the level of economic activity than these simple establishment counts. However, caution must be observed in making such approximations because there are very significant differences in the relationships among employment, payroll, cost of materials, value of shipments, value added, etc., for individual plants within each 4-digit industry and particularly by geographic area within industry. Judgments based on broad industry averages may be subject to serious error if these averages are applied to groups of plants within counties and industries. On an all-manufacturing basis, the average employment per establishment for 1963 for each of the standard employment size classes is as follows:

1 to 19 employee class, 6 employees;
20 to 49 employee class, 31 employees;
50 to 99 employee class, 69 employees;
100 to 249 employee class, 155 employees;
250 to 499 employee class, 346 employees;
500 to 999 employee class, 684 employees;
1,000 or more employee class, 2,545 employees.

Location of Manufacturing Plants: 1963
